Dear Hiring Manager,

I am a 3rd-year Computer Engineering student at **L.J. University, Ahmedabad**, pursuing B.Tech in AI with Data Science, with a strong passion for building full-stack web applications and intelligent systems. With hands-on internship experience and a growing portfolio of real-world projects, I am eager to contribute meaningfully to a forward-thinking team.

During my internship at **WeeTech Institute**, I developed responsive UIs using HTML, CSS, and JavaScript, supported backend functionality with PHP and MySQL, and collaborated in Agile workflows. Earlier, at **Cuelix Infotech**, I designed authentication modules, built CRUD systems, and worked with RESTful API integrations — giving me solid grounding across the full development lifecycle.

Beyond internships, I've independently built projects that reflect my breadth of interest: an **AI-Powered Fake News Detector** achieving 92.8% classification accuracy with Scikit-learn and Django; an **E-Commerce Backend** using a microservices architecture; and an **AI Review Generator** with authenticity prediction. Each project pushed me to connect machine learning with practical, user-facing interfaces.

I am actively expanding my knowledge of **Node.js, Express.js, MongoDB, Docker**, and cloud platforms. I thrive in collaborative environments, learn quickly, and bring genuine enthusiasm to every problem I work on. I would welcome the opportunity to grow within your team while contributing to impactful, real-world solutions.

HTML / CSS / JS

PYTHON

DJANGO

NODE.JS

EXPRESS.JS

MYSQL

MONGODB

SCIKIT-LEARN

GIT

RESTFUL APIS

AGILE

Thank you for your time and consideration.

I look forward to the possibility of connecting with you.
